Loading classes:

A15: Suitable for use only in locations of pedestrian and bicycle traffic and green areas where traffic is not possible even periodically.

B125: For pathways and pedestrian areas which can only be trafficked for supply and sanitation purposes, or in cases of emergency. Set in the pavement to cover storm drains or maintenance holes, it is suitable for passenger car parking areas or areas which can be used as parking lots.

C250: Suitable for covering storm drains or maintenance holes, installed within the range of the kerbside, on roads and any location subject to traffic. It can extend into the highway up to 0.5m at most.

D400: Suitable for covering storm drains or maintenance holes installed on motorways, roads, or any location subject to traffic, up to the wheel load indicated on the lid. **The bearing surface of the round manhole frames and covers prevent them from tilting!**

We can supply the lids with inscriptions or other decorative motifs such as coats of arms, or logos. Waterproof variants of certain models are also available.
